

## **FAMILY SUPPORT DURING STAY**

Dear Family, Sponsor or loved one. We understand that placing your loved one in a Skilled Nursing facility is a big decision. Typically, there is an adjustment period of around 30 days for residents to start feeling comfortable in their new environment. As a facility, we highly encourage you staying involved in your loved ones life, in a meaningful way. We recommend that you visit as frequently as you can. We also highly encourage that you continue to transport your loved ones to their medical appointments as much as possible. This is so vital, because if you think about it, no one knows your loved one, as well as you do. You are able to communicate crucial medical history to the physician in a way that no one else can, including our own facility staff. We know how much you care for and love your family member. The more involved you are with their activities of daily living, the better their outcomes will be emotionally, physically and spiritually. Again, we thank you for choosing Crystal Care Center of Mansfield regarding your loved ones Long-term and/or short-term Rehab needs.

Respectfully,

Anthony L. Wheaton  
Administrator  
Crystal Care Center of Mansfield
